

19" LED Display

Eco-Friendly and Performance Enhancing

VG932m-LED

The 19" ViewSonic® VG932m-LED features a standard 4:3 aspect ratio and a native resolution of 1280x1024. Designed with 5ms video response time, DVI / VGA dual inputs, and integrated speakers, the VG932m-LED is an ideal choice for business applications that include mixed data, audio, graphics, and video content. Its ergonomic design with height adjust, 360 degree swivel and tilt, helps enhance the user's comfort during long hours of computer work. VESA mountable design enables the display to wall mount or connect to a display arm. Also, the VG932m-LED comes with LED panel and Eco-mode to achieve low energy cost and low total cost of ownership. Whether it is for productivity or for ergonomics, the VG932m-LED is a great choice for schools, governments and corporations.

Eco-Mode Conserves More Energy

ViewSonic's proprietary Eco-mode function is built into all LED displays, offering options to "Optimize (85%)" or "Conserve (65%)". Both modes reduce display brightness and conserve up to 35%* energy. Especially in a low ambient light, Eco-mode adjusts brightness and improves visibility while reducing eye fatigue and prolonging the display's lamp life. With Eco-mode, lamp replacement expenditures are reduced while practicing eco-friendliness.

Outstanding Ergonomics for Ultimate Comfort

The VG932m-LED provides you with great ergonomic flexibility with height adjustment, 360° swivel and tilt. It is also VESA mount ready for additional ergonomic comfort.

19" LED Display

VG932m-LED

10,000,000:1 MEGA Dynamic Contrast Ratio

Dynamic contrast ratio defines a differentiating relationship between darkest and brightest colors when reproducing an image. With dynamic contrast ratio, VG932m-LED is capable of automatically detecting the brightness and darkness of an image and adjusts the LED backlight accordingly. It maximizes grayscale and color ranges and boosts contrast ratio to an ultrahigh 10,000,000:1, resulting in rich, vibrant visuals.

Normal

Dynamic Contrast Ratio

Planet-Friendly Mercury-Free LED Backlighting

LED backlighting enhances display performance, delivers an outstanding color range, and adjusts contrast ratios for remarkably detailed images. The LED backlighting further conserves up to 50%* more energy when compared to conventional displays to allow a slimmer profile and a most pleasing entertainment experience.

Reviving Color with sRGB Color Correction Technology

Accurate and consistent color performance is essential for professionals in graphic design, video editing, and other professional environments. With built-in sRGB color correction technologies, the VG932m-LED series reproduces 100% sRGB rich color performance and captures images in their original and true colors.
